TPE for Cosmetic Packaging

Meet the Needs of the Cosmetic Market

Advantages at a glance

- Resistance to cosmetic chemicals
- Silky and velvety soft-touch surface feeling
- Established market requirements such as Regulation (EU) No 10/2011 and FDA – Code of Federal Regulations (CFR), California Proposition 65 and Regulation (EC) No 1223/2009 have been taken into account
- Processing by multi-component injection molding with a wide range of thermoplastic materials such as PP, PE, PA, PBT, PC, PETG, SAN and ABS
- Adhesion to most common polar and non-polar thermoplastics
- REACH and RoHS conformity
- Free of latex, PVC and phthalates
- No use of heavy metals
- Various coloring options available in-house
- Recyclable
- High level of service regarding regulatory topics
- Well established in numerous cosmetic packaging applications
- Bio-based compounds available: Customized solutions for various application fields. Please ask your personal TPE-specialist at KRAIBURG TPE.
