KRAIBURG TPE highlighting TPEs for cosmetics and skincare packaging applications at Chinaplas 2021

KRAIBURG TPE will be highlighting the multi-faceted benefits of THERMOLAST® K TPE compounds, which have properties required for beauty products packaging applications, at the upcoming CHINAPLAS, to be held from 13-16 April 2021, at Shenzhen World Exhibition and Conventional Center, China, at Hall 17, Booth A31.

Safe, eco-friendly materials

KRAIBURG TPE offers TPE materials that are recyclable, resistant to various cosmetic products, and product-contact safe. They are free from heavy metals, animal ingredients and latex and other toxic substances such as PVC or phthalates or carcinogenic or mutagenic substances.

The TPE compounds comply with international food-grade safety standards, such as the China GuoBiao (GB) standards (GB4806:2016), the Commission Regulation (EU) No 10/2011, the Code of Federation Regulation Title 21 (21CFR) of the US Food and Drug Administrator (FDA), as well as with ROHs and REACH standards.

Eye-catching shades with a soft-feel

For KRAIBURG TPE no detail is too small to deliver the perfect touch for cosmetic packaging. KRAIBURG TPE's TPE compounds offer a dry and pleasant surface feel for packaging applications and components including flip-top caps, slit valves, serum spoons, packaging seals, pencil grip surfaces, eyelash brush grips, and more.

The TPE compounds offer worldwide consistent colorability, which encourages creative designs for skincare and cosmetics packaging and for brand owners to stay competitive in the market.

About KRAIBURG TPE

KRAIBURG TPE (www.kraiburg-tpe.com) is a global manufacturer of thermoplastic elastomers. From its beginning in 2001 as a subsidiary of the historical KRAIBURG Group founded in 1947, KRAIBURG TPE has pioneered in TPE compounds, today being the competence leader in this industry. With production sites in Germany, the U.S., and Malaysia, the company offers a broad range of compounds for applications in the automotive, industrial, consumer, and strictly regulated medical sectors. The established THERMOLAST®, COPEC®, HIPEX®, and For Tec E® product lines are processed by injection molding or extrusion and provide numerous processing and product design advantages to manufacturers. KRAIBURG TPE features innovative capabilities as well as true global customer orientation, customized product solutions and reliable service. The company is certified to ISO 50001 at its headquarters in Germany and holds ISO 9001 and ISO 14001 certifications at all global sites. In 2019, KRAIBURG TPE, with 645 employees worldwide, generated sales of 190 million euro.
